

Concrete Pharmacy® BOND — DATASHEET

Latex Polymer Bonding Additive

PRODUCT DESCRIPTION:

Designed for use with Rapid Set® cement products and most other packaged hydraulic cements, BOND latex polymer additive increases the workability and adhesion properties of cement. By adding BOND, your mixture will become much more “sticky” allowing you to successfully bond to a variety of surfaces including concrete, brick, tile, wood, plaster, concrete block, stone, and asphalt.

USE:

With Rapid Set® Mortar Mix (55-lb. bag), Grout (55-lb. bag), Concrete (60-lb. bag), and DOT Repair Mix (55-lb. bag) use 1 to 8 packets of BOND for increasing adhesion to satisfy your project requirements. A trial batch is recommended to fine-tune the dosage and test for appropriate bonding. BOND may be used in combination with all other products of the Concrete Pharmacy®.

DIRECTIONS:

Dissolve BOND in the mixing water or add the BOND powder during the initial mixing of your cement product. Use enough BOND to achieve desired properties for your mix. Follow product mixing instructions described on the package of the cement product. Do NOT exceed 8 packets per 50 to 60 lb. bag of Rapid Set®. Proper surface preparation is required to obtain a good bond. Surfaces being bonded to must be clean, and free of dirt, oil, and other compounds, which can prohibit bonding. Surfaces should also be moist with water at the time of application.

WARNING:
