

Product Specification for:
Rapid Set® OnePass®

SECTION 09 25 00 – OTHER PLASTERING (JOINT COMPOUND)

Use Rapid Set® OnePass®: a cement based, fast setting, non-shrink, polymer modified spackling and joint compound that can be used from featheredge to 1/2 inch thick. Manufactured by CTS Cement Manufacturing Corp., 11065 Knott Avenue, Suite A, Cypress, CA, 90630. Phone: 800-929-3030. Website: www.rapidset.com

1. Shall contain high performance, water soluble polymers.
2. Shall be non-metallic with no added chlorides.
3. Shall be pre-blended requiring only the addition of water.
4. Shall have small, pre-measured packets available to add to the repair material per manufacturer's recommendations to slow down the set time, increase bond strength, lighten the color of the mix, or darken the color of the mix.
5. Working time shall be 20 minutes.

Water shall be potable. Prepare surface, mix, place, and cure per manufacturer's recommendations.
